> Hi Mark,
> It was great to talk to you this evening, I know you are going to be a great boss, lol.
> Attached at the reports requested to date that have not been completed. Most are from Commander Cohen. Alfredo had wanted the shooting reports to be the next ones I worked on, but I understand if the department has a different priority.
> It probably make sense to set priorities now and then rearrange them from time to time as other ideas or tasks arise.
> I've been working with Andres Lopez in the past and would like to continue to do so. He's also been creating automated reports and fine-tuning some of mine as the need arises. That way we don't both work on the same task and waste efforts. I also need someone at the department to check things from the "front-end" of the RMS since I'm not at your building and don't have access to that.
> As for dates for a presentation, next week is pretty full for me, but I have lots of availability the following week.
> Did you want to do Weds, Feb 17 at your 3pm meeting, or another day/time? I also have Friday, Feb 19, open for any time in the morning. If those don't work, I can look at Tuesday and Thursday.
> Let me know,
> Lorie
